Website Planning & Documentation

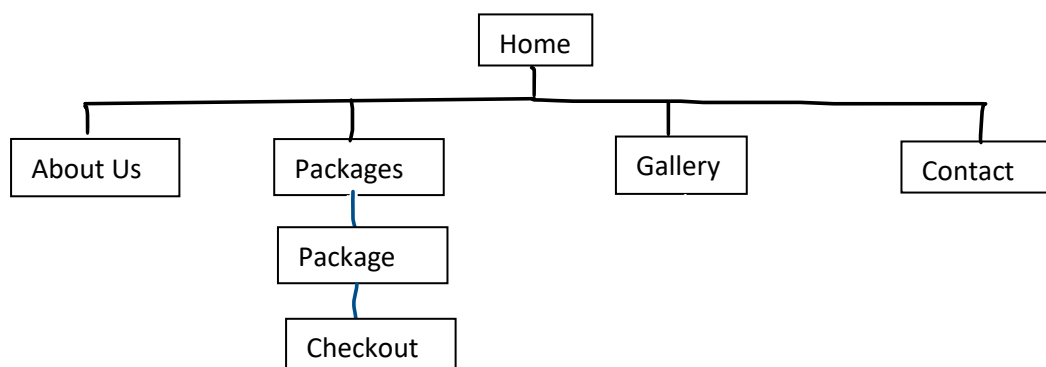

Website Specifications

- **Website Objective and Goals:** The main objective of this website is to convert visitors into gym members by setting up a judgment free identity. According to industry research, gym intimidation prevents nearly 50% of individuals from joining a gym. Therefore the goal is to lower this entry barrier by fitness plans, building trust and social proof through testimonials.
- **Target Audience:** The target audience consists of individuals in Gaborone and the surrounding areas nearby looking to get physically healthy, especially focusing on those who are currently overweight or underweight.
 - *Demographics:* Adults aged 18–45, university students and people, both men and women.
 - *Technical Aptitude:* Ranges from beginner to intermediate. The site uses a user interface to make sure that low digital literacy users can navigate the site easily.
- **Type of Website:** This is a static website designed for marketing. It informs people about the facility's offerings and capture their inquiries with contact details at the end of the website, in the footer.

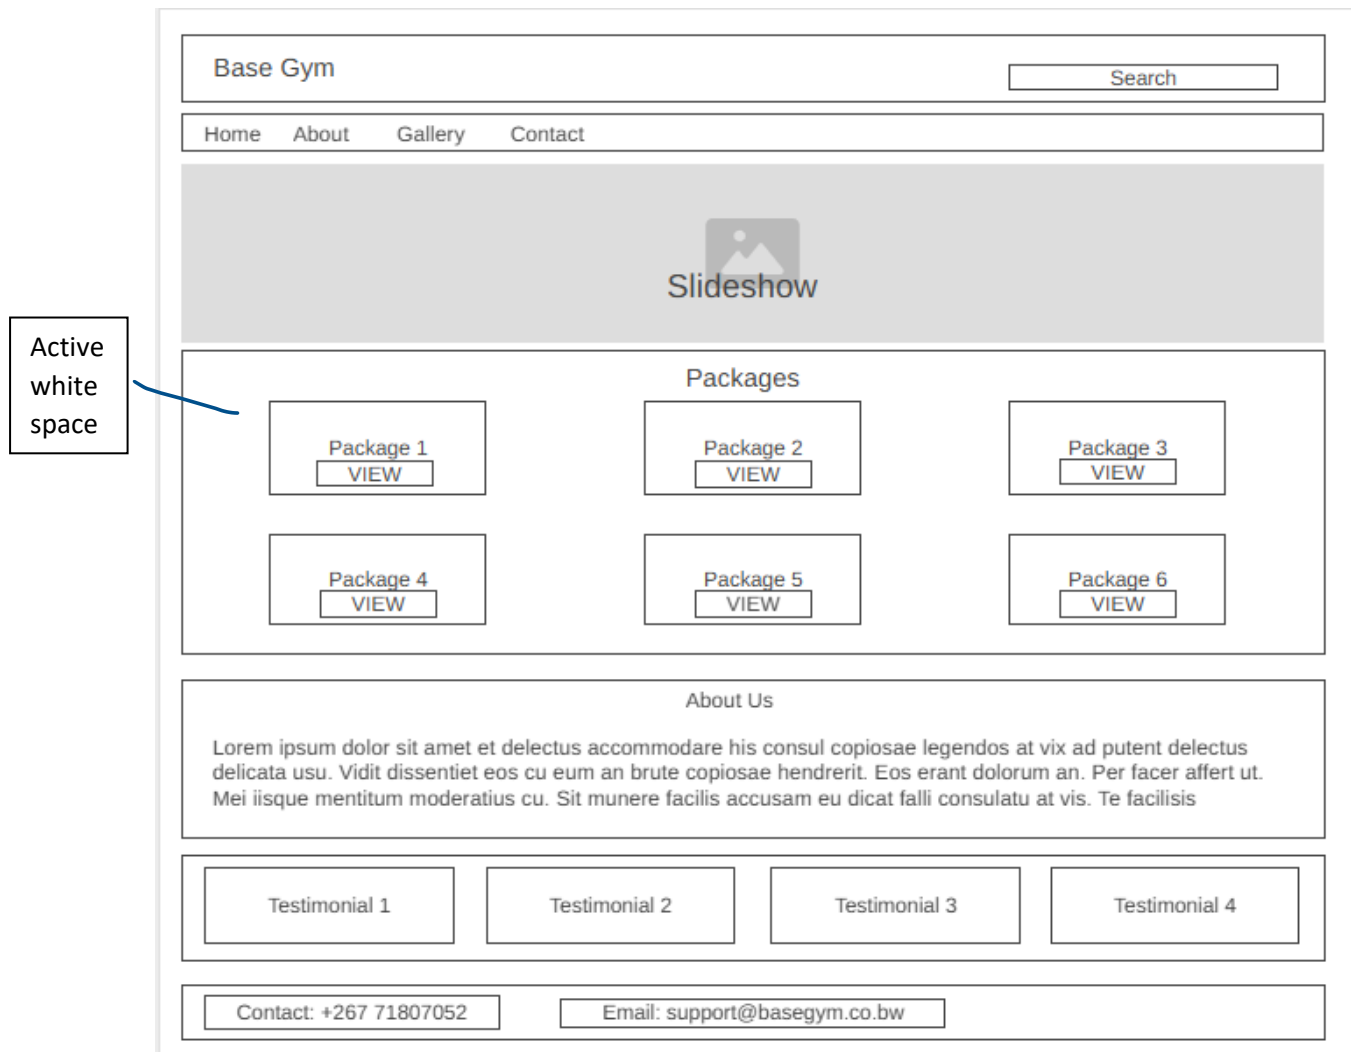

2. Information Design & Taxonomy

Site Map & Page Details: The website consists of five pages with a structured and accessible content shown below:

1. **Home (index.html):** image slideshow, packages overview, text, and client testimonials.
2. **About Us (about.html):** outline the gym's philosophy, and explain the judgment free culture.
3. **Packages (packages.html):** A detailed breakdown of the six training plans, pricing, and what each tier includes etc...
4. **Gallery (gallery.html):** images of the equipment and training environment and people training.
5. **Contact (contact.html):** outline the operating hours, contact details and an interactive form utilizing annotations for required fields.

3. Page Template Design

4. Technical Brief

- **Structural Layer (HTML):** Used to create a accessible page structure
- **Presentation (CSS & Bootstrap):** CSS is used for styling, while Bootstrap framework handles the responsive system. This ensures a mobile approach where content shrinks for smaller screens and expands for desktop monitors.
- **Behavioral Layer:** Utilized with the Bootstrap bundle to enable interactive elements, specifically the image carousel on the homepage.
- **Development Environment:** Visual Studio Code (VS Code)
